Education

University of Waterloo

Bachelor of Applied Science-Systems Design Engineering

- 3.8/4.0 GPA

Expected Grad: 2030

Waterloo, Ontario

Experience

AI Developer

Jan 2026 – Present

Cyntry *Mississauga, Ontario*

- Develop a multi-tenant SaaS platform using **TypeScript, Node.js (Express), and React** to automate consulting workflows, reducing consultant time by up to **50%**.
- Design and implement **30+ REST API endpoints** to support user activity, assessments, and platform features, with **PostgreSQL** providing secure and reliable data storage.
- Containerize and deploy the application using **Docker and DigitalOcean**, integrating **CI/CD pipelines** to automate testing, building, and cloud deployment for streamlined delivery and scalability.
- Leverage AI tools such as **Claude Code** to accelerate feature development and optimize workflows.

Teaching Assistant

September 2024 – January 2025

Saint Joseph S.S. *Mississauga, Ontario*

- Supported a grade 9 science teacher in a class of **30+** students by assisting during lessons, grading **20+** assignments and creating interactive activities like Kahoot quizzes.
- Provided one-on-one support to students struggling with course material to help them stay on track and succeed.
- Independently planned and taught a full lesson as a final project, including developing the slideshow, in-class activities, and an assignment.
- Strengthened leadership, communication, and organizational skills through hands-on teaching and classroom involvement.

Pharmacy Technician

September 2023 – August 2025

Marketplace Pharmacy *Milton, Ontario*

- Received vendor shipments with **75+** products and accurately labeled products with appropriate price tags.
- Stocked and organized medications, ensuring accurate placement on designated shelves.
- Self-taught and proficiently utilized complex pharmacy software (Fillware) to review and update customer profiles and medical histories.
- Processed customer transactions efficiently and provided excellent service at checkout.

Projects

Pearson Airport Taxi Optimization | *Python, Machine Learning, NumPy, GeoPandas, Matplotlib*

March 2026

- Won the Industry 4.0 Case Competition by building a data-driven solution to improve airport ground traffic efficiency.
- Trained a CNN-based machine learning model to predict runway congestion prior to aircraft landing using flight data.
- Applied congestion predictions to optimize gate taxi routes, dynamically avoiding high-traffic areas.

3D Puzzle Project | *SolidWorks, 3D Printing*

November 2025

- Worked in a group of 5 to design and 3D-model **7** interlocking parts in SolidWorks to create a working moose container.
- Built a working twist-on mechanism by creating helical threads in SolidWorks.
- Optimized dimensions and tolerances so all components fit and assemble reliably after printing.
- Improved the design over 3 iterations to fix alignment and fit issues.

Leadership / Extracurricular

Audiovisual Crew

December 2022 – June 2025

President *Saint Joseph S.S.*

- Operated the audiovisual booth for **50+** school events.
- Demonstrated strong organization and attention to detail by planning event transitions, managing cue timing, and adapting to last-minute technical changes.

Soccer Coach

October 2022 – June 2025

Head coach *Erin Mills Soccer Club*

- Coordinated a team of **8** players in weekly 5v5 soccer games, applying leadership and organizational skills.
- Managed game strategy, including formations, substitutions, and tactics.
- Promoted an inclusive and engaging environment, ensuring all players enjoyed and participated regardless of skill level.

Skills

Languages: Python, Javascript (Node and React), HTML/CSS, TypeScript, Java, C++, SQL.

Developer Tools: Git, GitHub, VS Code, Cursor, Docker, AWS, Azure, Digital Ocean.

Technologies: Excel (VBA, Pivot Tables, VLookup), MATLAB, Solidworks, AutoCAD.
